THE

AMERICAN JOURNAL OF SCIENCE.

EDITORS

JAMES D. AND E. S. DANA, AND B. SILLIMAN.

ASSOCIATE EDITORS

PROFESSORS ASA GRAY, JOSIAH P. COOKE, AND JOHN TROWBRIDGE, OF CAMBRIDGE,

PROFESSORS H. A. NEWTON AND A. E. VERRILL, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA.

THIRD SERIES.

VOL. XXI.—[WHOLE NUMBER, CXXI.]

Nos. 121—126.

JANUARY TO JUNE, 1881.

WITH PLATES I TO X AND XII TO XIX.

NEW HAVEN, CONN.: J. D. & E. S. DANA.
1881.

ERRATA.

Page 86, line 14 from bottom for ten volumes, etc., *read* two volumes, etc.
Page 496, lines 4 and 11, for *C. Cumingiæ*, *read C. Cummingiæ*.

Tuttle, Morehouse & Taylor, Printers

CONTENTS OF VOLUME XXI.

NUMBER CXXI.

Page

ART. I.—Contributions to Meteorology; by ELIAS LOOMIS. (Plates I, II, III,) 1

II.—The Albany Granite, New Hampshire, and its Contact Phenomena; by GEORGE W. HAWES, ... 21

III.—Theory of the Constitution of the Sun; by CHARLES S. HASTINGS, ... 33

IV.—Review of Professor Hall's recently published volume on the Devonian fossils of New York; by CH. BARROIS, 44

V.—Earthquake at the Philippine Islands, of July, 1880. (Plate IV), ... 52

VI.—Papers on Thermometry from the Winchester Observatory of Yale College; by LEONARD WALDO, ... 57

VII.—JAMES CRAIG WATSON, ... 62

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Existence of Ozone in the Atmosphere, SCHÖNE: Meteorological use of Thallium-papers, SCHÖNE, 66.—Nature of the Petroleum from the Caucasus, BEILSTEIN and KURBATOW, 67.—New Hydrocarbon from Sequoia gigantea, LUNGE and STEINKAULER, 68.—Bäyer's Synthesis of Indigotin, ROSENSTIEHL, 69.—Isopropylene-neurine, MORLEY: Investigation of Dr. BRUHL on the Molecular Structure of Organic Compounds, 70.—Chemical Energy and Electromotive force of different galvanic elements, THOMSEN: Spectra of the compounds of Carbon with Hydrogen and Nitrogen, LIVEING and DEWAR, 74.—Behavior of gases under the influence of electrical discharges. WIEDEMANN: Theoretical and practical treatise on the manufacture of Sulphuric acid and Alkali, LUNGE, 75.

Geology and Natural History.—Notes on alleged changes in the relative elevations of Land and Sea, H. MITCHELL, 77.—Further discoveries of fossils in the Wappinger Valley or Barnegat limestone. W. B. DWIGHT, 78.—Volcanic Eruptions of Mauna Loa, Hawaii, 79.—The Genesis of the Ores of Iron, J. S. NEWBERRY: Descartes l'un des Créateurs de la Cosmologie et de la Géologie. M. DAUBRÉE: Geological map of a portion of the Southern Interior of British Columbia, G. M. DAWSON: Application of Organic Acids to the examination of Minerals, H. C. BOLTON, 80.—Proceedings of the Academy of Natural Sciences of Philadelphia: Ctenophoræ, C. CHUN, 81.—The Spiral Character of Cœlenterate Development, J. YOUNG: American Ornithological Bibliography, E, COUES, 83.

Miscellaneous Scientific Intelligence.—Some incidental results from a series of analyses of air, E. W. MORLEY, 83.—National Academy of Sciences: Annual Report of the Chief of Engineers to the Secretary of War, 84.—Report on the Meteorology of Tokio, T. C. MENDENHALL: Report of the United States Commissioner of Fish and Fisheries. S. F. BAIRD, 85.—Röntgen's Principles of Thermodynamics, A. J. DUBOIS: The American Naturalist: The Kansas City Review of Science and Industry, T. S. CASE: Medals of the Royal Society: Physical Treatise on Electricity and Magnetism, J. E. H. GORDON, 86.

Obituary.—Benjamin C. Brodie: J. Charles Almeida: Michel Chasles, 86.

NUMBER CXXII.

Page

ART. VIII.—Julius Thomsen's Thermochemical investigation of the Molecular Structure of the Hydrocarbon Compounds; by J. P. COOKE, ... 87

IX.—Determination of the Force of Gravity at the Summit of Fujiyama, Japan; by T. C. MENDENHALL, ... 99

X.—Notes on Alaska and the vicinity of Bering Strait; by W. H. DALL; with Plate V (a map, not numbered), ... 104

XI.—Relation of Devonian Insects to later and existing types; by S. H. SCUDDER, ... 111

XII.—Meteoric Iron of Lexington Co., S. C.; by C. U. SHEPARD, 117

XIII.—Date of the Glacial era in Eastern North America; by G. F. WRIGHT, ... 120

XIV.—A Remarkable nugget of Platinum; by P. COLLIER, 123

XV.—A New genus and species of Air-breathing Mollusk from the Coal-measures of Ohio; by R. P. WHITFIELD, 125

XVI.—Hiddenite, a variety of Spodumene; by J. L. SMITH, 128

XVII.—Remarks on the Genus Obolella; by S. W. FORD, 131

XVIII.—The Millstone Grit in England and Pennsylvania; by H. M. CHANCE, ... 134

XIX.—Principal Characters of American Jurassic Dinosaurs; by O. C. MARSH; Part IV; with Plates VI, VII, VIII, 167

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Improved Process for preparing potassium iodide from Seaweed, ALLARY and PELLIEUX: Volumes of certain Elements at their Boiling Points, RAMSAY and MASSON, 136.—Vanadium Sulphides, KAY: Hydrocarbons of American Petroleum, BEILSTEIN and KURBATOW, 137.—Inulin, KILIANI, 138.—Saccharin and Saccharinic Acid, SCHEIBLER: Synthesis of Tropic Acid, LADENBURG and RÜGHEIMER: Experimental Researches upon the magnetic rotatory Polarization of Gases, BECQUEREL, 139.—Influence of Gases and Steam upon the Optical properties of reflecting surfaces: Physical Treatise on Electricity and Magnetism, GORDON, 140.—Space protected by a Lightning Conductor. W. H. PREECE, 141.—Theoretical and practical Treatise on the Manufacture of Sulphuric Acid and Alkali, G. LUNGE, 144.

Geology and Natural History.—Lava-fields of Northwestern Europe. A. GEIKIE, 145.—Volumes of solid and liquid Cast Iron, J. B. HANNAY, 147.—Climate of Siberia in the Era of the Mammoth, H. H. HOWORTH, 148.—Climatic Changes of later Geological time, J. D. WHITNEY, 149.—Six Lectures on Physical Geography, S. HAUGHTON, 150.—Address by H. C. Sorby, President of the Geological Society of London, 152.—Geological Survey of Pennsylvania, 153.—Quaternary after the Era of the cave-animals in Europe, M. TARDY: River Channels filled with basalt, J. J. STEVENSON, 155.—Occurrence of *Proëtus longicaudus* Hall, H. S. WILLIAMS, 156.—Northern Sahara, ROLLAND: Arctic Coal: Claiborne Group and its remarkable fossils: Paleontology of Austria-Hungary: A crystallized Mineral made from bricks, J. E. REYNOLDS, 157.—Fossil Spongespicules from a clay bed near Sligo, Scotland, H. J. CARTER: Glaciation of the Shetland Isles and the Orkneys, 158.—Queensland Geology, R. L. JACK: Mineral discoveries in Alexander Co., N. Carolina, W. E. HIDDEN, 159.—Jarosite from Arizona, S. E. PENFIELD: Jarosite from Colorado, G. A. KÖNIG: Octahedrite from Burke Co., N. Carolina, W. E. HIDDEN, 160.—Urano-thorite, P. COLLIER: Mineralojia por I. DOMEYKO: Las Especies Minerales de la Republica Argentina, D. L. BRACKEBUSCH, 161.—Zoology for Colleges, A. S. PACKARD, 162.

Astronomy.—Figure of the Planet Mars, HENNESSY, 162.

Miscellaneous Scientific Intelligence.—Ocean temperatures in the Arctic, O. T. SHERMAN, 163.—International Exposition of Electricity, 164.—History of the Jetties at the Mouth of the Mississippi, CORTHELL, 165.—*Obituary.*—M. Chasles, 165.

NUMBER CXXIII.

Page

ART. XX.—Phosphorograph of a Solar Spectrum; by J. W. DRAPER, ... 171

XXI.—Structure and affinities of *Euphoberia* of Meek and Worthen; by S. H. SCUDDER, ... 182

XXII.—The Actinic Balance; by S. P. LANGLEY, ... 187

XXIII.—Recent American Earthquakes; by C. G. ROCKWOOD, 198

XXIV.—Liquid Carbon dioxide in Smoky Quartz; by G. W. HAWES, ... 203

XXV.—Gaseous Substances contained in the Smoky Quartz of Branchville, Conn.; by A. W. WRIGHT, ... 209

XXVI.—Origin of new points in the topography of North Carolina; by W. C. KERR, ... 216

XXVII.—Occurrence of Realgar and Orpiment in Utah Territory; by W. P. BLAKE, ... 219

XXVIII.—On the solubility of Chloride of Silver in Water; by J. P. COOKE, ... 220

XXIX.—Papers on Thermometry from the Winchester Observatory of Yale College; by L. WALDO, ... 226

XXX.—Determination of the Coefficient of Expansion of a Diffraction grating by means of the Spectrum; T. C. MENDENHALL, ... 230

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Density of Iodine Vapor, CRAFTS and MEIER, 222.—Researches upon Ozone, HAUTEFEUILLE and CHAPPINE, 233.—Chlor-hyponitric acid of Gay Lussac, GOLDSCHMIDT, 234.—Mercuric Fulminate and its Decomposition, BERTHELOT and VIEILLE, 235.—Direct production of Chloroform and Bromoform, DAMOISEAU: Identity of Arabinose with Lactose, KILIANI: Absorption of dark Heat rays by Gases and Vapors, LECHER and PERNTER, 236.—Dust, Fogs, and Clouds, AITKEN, 237.—Relation between the Diurnal Range of the Magnetic Declination and Horizontal force, ELLIS, 238.—U. S. Coast and Geodetic Survey, PATTERSON, 240.—Magnetic Declination in Missouri, 241.

Geology and Mineralogy.—Pennsylvania Geological Survey, C. A. ASHBURNER, 241.—Report of Progress of the Geological Survey of Canada, for 1878–79, A. R. C. SELWYN: Monograph of the Silurian Fossils of the Girvan District in Ayrshire, H. A. NICHOLSON and R. ETHERIDGE, 243.—Revue de Géologie pour les Années, 1877 et 1878, DELESSE et LAPPARENT: Annelid Jaws from the Wenlock and Ludlow formations of the west of England, G. J. HINDE: Xenotime, from Burke County, N. C., W. E. HIDDEN: Geological Charts of the Yellowstone Park, and of the region adjoining on the south in the territories of Wyoming, Idaho and Utah, 244.

Botany and Zoology.—Power of Movement in Plants, C. DARWIN, 245.—Eucalyptographia, a Descriptive Atlas of the Eucalypts of Australia and the adjoining islands, F. v. MULLER, 249.—Flora of Essex County, Mass., J. ROBINSON: Botany of California, S. WATSON: Giant Squid (Architeuthis), A. E. VERRILL, 251.

Miscellaneous Scientific Intelligence.—Zeitschrift fur Instrumentenkunde: Organ für Mittheilungen aus dem gesammten Gebiete der wissenschaftlichen Technik: Academy of Sciences, Paris, B. A. GOULD: Bibliographie Générale de l'Astronomie, J. C. HOUZEAU and A. LANCASTER, 253.—Washburn Observatory, University of Wisconsin: A Text Book of Elementary Mechanics for the use of Colleges and Schools, E. S. DANA: Massachusetts Institute of Technology, 254.

NUMBER CXXIV.

Page

ART. XXXI.—Monograph by Professor MARSH on the Odontornithes, or Toothed Birds of North America, ... 255

XXXII.—Elements in Orographic Displacement; by W. J. McGEE, ... 276

XXXIII.—Indices of Refraction of certain Compound Ethers; by J. H. LONG, ... 279

XXXIV.—Whitfield County, Georgia, Meteoric Iron; by W. E. HIDDEN, ... 286

XXV.—The Basin of the Gulf of Mexico. With a map (Plate IX); by J. E. HILGARD, ... 288

XXXVI.—The Geology of Florida, with a map; by E. A. SMITH, ... 292

XXXVII.—The Magnetic Survey of Missouri; by F. E. NIPHER, ... 310

XXXVIII.—American Sulpho-selenides of Mercury; by G. J. BRUSH, ... 312

XXXIX.—Effect of Great Cold upon Magnetism; by J. TROWBRIDGE, ... 316

XL.—Channel-fillings in Upper Devonian Shales; by H. S. WILLIAMS, ... 318

XLI.—New Order of Extinct Jurassic Reptiles (Cœluria). With Plate X; by O. C. MARSH, ... 339

XLII.—Discovery of a Fossil Bird in the Jurassic of Wyoming; by O. C. MARSH, ... 341

XLIII.—American Pterodactyls; by O. C. MARSH, ... 342

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Atomic Weight of Aluminum. MALLET. 321.—Light which appears on Metallic Electrodes which are placed in hydrogen gas at different pressures, O. LOHSE: The *b* line in the Solar Spectrum, YOUNG: Action of an intermittent beam of radiant heat upon Gaseous matter, TYNDALL, 323.—Tones which arise in a gas as the effect of intermittent radiation, RÖNTGEN, 324.

Geology.—International Geological Congress at Bologna, 325.—Geological terms for Stratigraphical Subdivisions, 326.—Metamorphic rocks containing fossiliferous beds, 327.—Bulletin of the U. S. Geological and Geographical Survey of the Territories, 328.—Description of the Coal Flora of the Carboniferous Formation in Pennsylvania, and throughout the United States, LESQUEREUX, 329.

Botany and Zoology.—British Moss-Flora, BRAITHWAITE, 329.—Origin of starch grains, SCHIMPER: Botany of California, WATSON, 330.—Gymnosporangia or Cedar-apples of the United States, FARLOW, 332.—Regeneration of lost parts in the Squid, Loligo Pealei, VERRILL, 333.

Astronomy.—Total Solar Eclipses of July 29th, 1878, and January 11th, 1880: Polarization of the Corona during the Solar Eclipse of July 29, 1878, WRIGHT, 334.—Memoirs of the Royal Astronomical Society of London, 335.

Miscellaneous Scientific Intelligence.—Soldering by compression, SPRING, 336.—Geodesy, CLARKE: Memorial volume of Benjamin Peirce: Atomic Theory, WURTZ: Third International Geographical Congress, 337.—Illinois State Laboratory of Natural History: Reports on dredging under A. Agassiz in the steamer "Blake," 338.—*Obituary.*—John J. Bigsby: E. Boricky: James Tennant: Joseph A. Clay, 338.

NUMBER CXXV.

Page

ART. XLIV.—Action of Frost in the arrangement of superficial earthy material; by W. C. KERR, ... 345

XLV.—Dall's Observations on Arctic Ice, and the bearing of the facts on Glacial phenomena in Minnesota; by N. H. WINCHELL, ... 358

XLVI.—Projection of lines of equal pressure in the United States, west of the Mississippi River; by H. A. HAZEN, 361

XLVII.—Neumann's Method of calibrating Thermometers, with ways of getting columns for calibration; by T. RUSSELL, ... 373

XLVIII.—William Hallowes Miller; by J. P. COOKE, ... 379

XLIX.—Existence of Ice and other bodies in the solid state at high Temperatures; by T. CARNELLEY, ... 385

L.—Geology of Peace River Region; by G. M. DAWSON, ... 391

LI.—Shadows obtained during the Glow discharge; by H. B. FINE and W. F. MAGIE, ... 394

LII.—New form of Galvanometer for powerful Currents; by C. F. BRACKETT, ... 395

LIII.—American Jurassic Dinosaurs; by O. C. MARSH. With seven plates (XII to XVIII), ... 417

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Chlorhydrates of metallic Chlorides, BERTHELOT, 396.—Characteristic color-reaction of the Sulph-hydrates, CLAESSON: Composition of Sodium Hyposulphite, BERNTHSEN, 397.—Ignition of Combustibles by Nitric Acid, KRAUT: Pernitric Oxide, BERTHELOT: Atomic weight of Platinum, SEUBERT, 398.—Compound formed by Camphor with Alcohol, BALLO: Naturally-occurring Mydriatic Alkaloids, LADENBURG: Synthesis of Tropic acid, SPIEGEL, 400.—Photographs of Nebulæ, M. J. JANSSEN: New form of Mercury-pump, E. BESSEL-HAGEN: Absorption of the Sun's rays by the Carbonic Acid of the Atmosphere, E. LECHER, 401.—Conversion of Radiant Energy into sonorous vibrations, W. H. PREECE: Tidal friction of a Planet attended by several Satellites, and on the Evolution of the Solar System, G. H. DARWIN, 402.—Sight, J. LECONTE, 405.

Geology and Mineralogy.—Jurassic and underlying strata in the Section of the Alps along the St. Gothard Tunnel, 405.—The great fault in the Alps after the Carboniferous era, M. LORY, 406.—Radiolarians (Polycystines), making for the most part the Jasper beds of Tuscany, D. PANTANELLI: Fossil Sponge-spicules from the Upper Chalk, found in the interior of a single flint-stone from Horstead in Norfolk, G. J. HINDE: Vertebrates of the Permian of Texas, E. D. COPE: Report of the Professor of Agriculture of the University of California, 1880, E. W. HILGARD, 407.—Biennial Report of the State Geologist of the State of Colorado, J. A. SMITH, 408.—Grundlinien der Geologie von Bosnien-Hercegovina: Journal of the Cincinnati Society of Natural History: Geological Reports recently issued, 409.—Lazulite from Canada: Minerals and Mineral Localities of North Carolina: Durability of Building Stones, H. A. CUTTING, 410.—Brief notices of some recently described minerals, 411.—Analysis of Columbite, E. J. HALLOCK, 412.

Botany and Zoology.—Notes on Orchideæ and on Cyperaceæ, G. BENTHAM: Germination and Histology of the seedling of Welwitchia, F. O. BOWER, 412.—J. Freyn, 413.—Geographical distribution of certain Freshwater Mollusks of North America, A. G. WETHERBY, 414.

Miscellaneous Scientific Intelligence.—Distribution of Time Signals, 414.—Changes in water-level of lakes on the borders of Oregon and California, B. F. DOWELL: Bibliographie Astronomique, 415.—Report of the Superintendent of the United States Coast Survey, 416. *Obituary.*—M. Achille Delesse, 416.

NUMBER CXXVI.

Page

ART. LIV.—Geological relations of the Limestone Belts of Westchester County, New York: Southern Westchester County and Northern New York Island; by J. D. DANA. With a map (Plate XIX), ... 425

LV.—Papers on Thermometry from the Winchester Observatory of Yale College; by L. WALDO, ... 443

LVI.—Reduction of Air-pressure to Sea-level, and the Determination of Elevations by the Barometer; by H. A. HAZEN, ... 453

LVII.—Nodule of Chromite in the interior of compact Meteoric Iron from Cohahuila; by J. L. SMITH, ... 461

LVIII.—Production of Sound by Radiant Energy; by A. G. BELL, ... 463

LIX.—The Solar Parallax as derived from the American Photographs of the Transit of Venus, 1874, December 8–9; by D. P. TODD, ... 491

LX.—Fossil Fishes from the Devonian Rocks of Scaumenac Bay, in the Province of Quebec; by J. F. WHITEAVES, .. 494

LXI.—Rain-fall in Wallingford, Connecticut, between 1856 and 1881; by B. F. HARRISON, ... 496

LXII.—New Jurassic Mammals; by O. C. MARSH, ... 511

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Direct Synthesis of Ammonia, JOHNSON, 498.—Blood-crystals and their Coloring Matter, STRUVE, 499.—Absorption Spectra of Colorless Liquids, RUSSELL and LAPRAIK, 500.—Supposed "Polarization of Sound," ROBINSON, 501.

Geology and Natural History.—Zinc-ore Deposits of Wiesloch in Baden, A. SCHMIDT, 502.—Geological Map of the United States, C. H. HITCHCOCK, 505.—Report on the Geology of Southern New Brunswick, L. W. BAILEY, G. I. MATTHEW and R. W. ELLS: Text Book of Systematic Mineralogy, H. BAUERMANN, 506.—Geniculated Zircons, from Renfrew, Canada, W. E. HIDDEN: Rabenhorst's Kryptogamen-Flora von Deutschland, Oesterreich und der Schweiz, G. WINTER, 507.—Notes Algologiques, deuxième fascicule, E. BORNET and G. THURET: Zoological affinities of Halysites, A. E. VERRILL, 508.

Miscellaneous Scientific Intelligence.—Elements of Comet (*a*), 1881, Swift: National Academy of Sciences, 509.—Popular Lectures on Scientific Subjects, H. HELMHOLTZ: The Constants of Nature, Part IV; Atomic weight determinations: a digest of the investigations published since 1814, G. F. BECKER, 510.

INDEX TO VOLUME XXI, 515.
